- ROLL NUMBER : 23cd053
- ROLE : DESIGNER

As a new user,

I want to register on the website,

So that I can access exclusive features.

Acceptance Criteria:

Navbar:

When I visit the registration page, I see a visually appealing navbar at the top left corner . The navbar displays the name of the team, making it clear that I am on the team's website.

Registration Form:

Below the navbar, I see a registration form.

The form includes the following fields:

Name

Email

Set Password

Confirm Password

Each field has a label, and the form is styled to be visually appealing.

Password Matching Validation:

As I enter my information in the form, I notice that the "Set Password" and "Confirm Password" fields are required . When I submit the form, the JavaScript validation checks if the passwords match . If the passwords match, the console logs "true" .If the passwords do not match, the console logs "false."

User Feedback:

After submitting the form, I expect to receive clear feedback indicating whether the password confirmation was successful or not.

The website should guide me on how to correct any errors, ensuring a smooth registration experience.

Visual Appeal:

The overall design of the page, including the form and navbar, should be visually appealing and user-friendly.

Thank you
